Disclaimer: These recommendations are based on operating the batch plant with standard concrete and following proper maintenance and cleaning procedures. The use of experimental cementitious materials, unusual aggregates, or abrassive chemical additives, as well as inadequate maintenance or cleaning practices, may significantly reduce the service life of the components. Extreme weather conditions may reduce the life cycle of the parts and increase maintenance checks. Ideally all customers have Consumables, Wearables and stock parts at all times to prevent down-time in operation. Please note Consumables and Wearables are NOT covered under warranty.					
Wearables Definition: Parts that gradually degrade through friction, contact, or mechanical stress during operation and need periodic replacement once worn beyond their limit.
