

TECHNICAL DATA SHEET

COBOD MONITORING KIT

Product name	COBOD Monitoring Kit
Compatibility	COBOD BOD2 3D Construction Printer
Camera Resolution	4MP
Night Vision Range	Up to 20 meters (machine powered)
Connectivity	Network Port
Integration	COBOD BOD2 machine cameras

The COBOD Monitoring Kit is an advanced add-on component designed to enhance control over a construction site. It features high-quality 4MP PTZ cameras providing real-time video to an on-site recording hub, accessible remotely via a network port. Night-time surveillance is seamless due to native IR technology in the cameras, offering clear viewing up to 20 meters when the machine is operational. The NVR (Network Video Recorder) hub is discreetly placed in its cabinet, adjacent to the E-box for easy management. Additionally, the kit seamlessly integrates existing machine cameras, ensuring comprehensive site coverage.

Key Features:

- ▶ Enhances surveillance with high-quality 4MP PTZ cameras for real-time video monitoring.
- ▶ Facilitates direct and historical monitoring through network connectivity.
- ▶ Provides clear night-time viewing up to 20 meters (when the machine is powered) with native IR technology.
- ▶ Streamlines video recording with an NVR recording hub housed in a discrete cabinet.
