

TECHNICAL DATA SHEET

COBOD HT EXTENSION NOZZLE

Product name	COBOD HT Extension nozzle
Compatibility	COBOD Concrete Steel Nozzles and HT Printhead
Length	600mm
Pipe Connection	4" BSPP
Connection (Printhead)	Female 4" Connector Coupling

The COBOD HT Extension Nozzle is a product designed to enable extended reach during the printing process for printing around rebar or other obstacles. It is compatible with our COBOD Concrete Steel Nozzles in various sizes and the HT Printhead. The extension nozzle can be easily attached and detached from the printhead and nozzle using couplings, making it convenient to use. During the installation of the extension nozzle, it is important to ensure proper alignment as any misalignment will be multiplied down to the nozzle and can cause imprecision when printing. Therefore, proper alignment during installation is crucial to ensure precision when printing to achieve a reliable result during printing operations.

Key Features:

- ▶ Enables extended reach during the printing process.
- ▶ Compatible with COBOD Concrete Steel Nozzles and the HT Printhead
- ▶ Easy to attach and detach using couplings.
- ▶ 600mm in length and has a 4" BSP connection.
